ABOUT ME

Hello world,
I have been a professional Front-End Developer at established software companies for the past few years, using JavaScript frameworks like React, and Vue. On the backend, I have worked using languages like NodeJS, PHP, and Golang.

With over 10+ years of development experience, I am proficient in all aspects of the development cycle, from discovery, requirements gathering, planning, and coding to deployment, maintenance, and support. I possess experience working with a large agile team to develop scalable products in various programming languages. I can comprehend existing code quite well. Hence, fixing bugs, refactoring flawed code, or adding enhanced features are my primary strengths, but they are not limited to them.

A few technologies that I worked with:

- ☑ **Wireframe/ Prototype**
  Figma, Sketch App, Adobe XD, Zeplin, InVision and etc.
- ☑ **Front End**
  - TypeScript, React.js, Vue.js, Next.js, Nuxt.js, Gatsby.js
  - Redux, Flux, Vuex
  - Bootstrap, Tailwind CSS, Material UI, Vuetify
  - Jest, Cypress, React Testing Library
- ☑ **Mobile**
  React Native, Flutter
- ☑ **Backend**
  NodeJS, PHP, Golang
